

NURSE PRACTITIONER APPOINTMENTS

Our nurse practitioners have had extensive training and experience in the management of common illnesses and injuries. They are able to prescribe medications such as antibiotics and pain relief and offer quick access to those in need of these services for acute problems.

GOOD FOR

Patients with common illnesses or minor injuries that need to be seen quickly; for example

- Chest infections
- Urinary Tract Infections (UTI's)
- Coughs and Colds
- Ear ache, ear infections
- Eye infections
- Rashes
- Minor Injuries

NOT USEFUL FOR

- Patients with more complex problems which need a GP
- Babies under 12 months of age
- Patients with an ongoing problem who have previously been seen by a GP or nurse practitioner
